UD10 – Práctica: Mi primer TDD

Nuevo proyecto creado en IntelliJ Idea:

Creación del directorio tests:

Marcar el directorio como un directorio de test:

Creación de nueva clase Java:

Creación del test con el import de junit:

Creación de clase 'Coche':

ICFSQ Ent ...

Ejecutamos el Test:

ICFSQ Ent ...

Test superado:

Modificación de TestCoche:

1CFSQ Ent ...

Creación del atributo velocidad:

ICFSQ Ent ...

·1CFSQ Ent ...

Voy haciendo commit en el repositorio de Git con las modificaciones:

ICFSQ Ent ...

Ejecuto de nuevo el test:

Test pasado correctamente:

ICFSQ Ent ...

Creo un nuevo test en la que se acelera la velocidad del coche a 30:

Creación de método acelerar:

·ICFSQ Ent ...

```
DANIELA VALENTINA GALEOTE CALDERON

             © Coche
                                                                    public void acelerar(int aceleracion) {
          resources
```

Pasa los test correctamente:

ICFSQ Ent ...

Hago los commits correspondientes.

Creación del test decelerar (aumenta la velocidad en 50 y decelera en 20 teniendo que pasar el test finalmente con una velocidad de 30):

ICFSQ Ent ...

Crear el método decelerar:

·1CFSQ Ent ...

Pasan los test correctamente:

1CFSQ Ent ...

(Subo el correspondiente commit)

Creación de test para que cuando decelera un coche su velocidad no puede ser menor que cero:

```

| Project | G | Edit View Navigate | Code | G is test_al_decelerar_un_coche_su_velocidad_no_pued...

| Project | G | Edit View Navigate | Code | G is test_al_decelerar_un_coche_su_velocidad_no_pued...

| Project | G | Edit View Navigate | Code | G is test_al_decelerar_un_coche_su_velocidad_no_puede_ser_menor_que_cero() | Code |
```

Falla el test (Se esperaba O pero el valor real fue -30):

ICFSQ Ent ...

Hacemos una modificación en Coche.java para que cuando la velocidad sea menor que 0 el valor se igual a 0:

Pasa el test correctamente:

·ICFSQ Ent ...

Y subo los commits correspondientes:

ICFSQ Ent ...

2 files committed: Test y método al decelerar la velocidad no puede ser menor que cero. (moments ago)

Refactorizado—

Creo una nueva rama en Git:

·1CFSQ Ent ...

ICFSQ Ent ...

Checked out new branch Refactorizado from HEAD (4 minutes ago)

Refactorizo los métodos añadiendo mi nombre al final:

ICFSQ Ent ...

ICFSQ Ent ...

Hago lo mismo con los demás métodos:

Así quedarían los métodos @Test de la clase TestCoche.java:

ICFSQ Ent ...

Hago los commits correspondientes:

ICFSQ Ent ...

1 file committed: Refactorizados los nombres de los métodos con mi nombre al final. (moments ago)

Hago lo mismo para los métodos de la clase Coche:

ICFSQ Ent ...

Hago los commits correspondientes:

ICFSQ Ent ...

2 files committed: Refactorizados nombres de los métodos de la clase Coche añadiendo mi nombre al final. (moments ago)
